

Procurement & Outsourcing

What we do

Our **Procurement & Outsourcing Advisory** team is focused on helping our clients organize and accomplish their work in more efficient, more effective, and less costly ways across business functions to streamline activities across the Source-to-Pay continuum.

Our **Supply Chain & Operations** team understands the complexities of designing and managing supply chains, and our strategic business approach helps create and sustain bottom-line value across the extended supply chain—from suppliers to customers.

How we deliver

Procurement & Outsourcing Advisory

- Conducting user-centric assessments of the intersection of people, process, and technology to create optimization roadmaps
- Leveraging the KPMG Powered methodology to reduce risk and accelerate system design and implementation projects
- Focusing on activities that result in sustainable time and cost savings

Supply Chain & Operations

- Conducting baseline assessments and identifying client improvement areas through a combination of client interviews, site walk-throughs, leading practice comparisons, and deep data analyses
- Developing future state target operating models, business cases for change, improvement area recommendations, and implementation roadmaps
- Implementing technology-enabled transformation programs to drive growth, improve operational efficiency, and reduce costs

Where we've made an impact

Procurement & Outsourcing Advisory

We assist our clients with:

- Source-to-Pay technology enabled transformation
- Target operating model design and implementation
- Sourcing and contracting process optimization
- Supplier enablement and trading partner transaction automation

Supply Chain & Operations

We assist our clients with:

- Strategy roadmap development and target operating model assessment, design, and implementation
- Supply Chain and Connected Commerce technology enabled transformation
- Building tailored custom centric supply chains that are resilient, demand-driven, sustainable, and tax-efficient

Who we hire

Candidates pursuing a bachelor's or master's degree in finance, supply chain, engineering, operations analysis, business or a related field

Ways we work

Our engagement teams, which can be varied in size up to nearly 50 individuals, work collaboratively to solve the complexities of our clients' challenges, which often involves cross-functional engagement with various business functions.

Maximizing savings related to supply and services spend, and achieving procurement and supply chain process efficiencies, are essential to optimizing financial performance in a competitive marketplace.
